MDP Parcel data products

The screenshot displays the website for the Maryland Department of Planning's Property Map Products. The page features a navigation menu with categories like HOME, OUR WORK, OUR PRODUCTS, YOUR PART, RESTRICTING, HISTORICAL TRUST, and DATA CENTER. The main content area is divided into four product tiles: MdProperty View DVDs (Advanced Desktop GIS), FINDER DVDs (User-Friendly Desktop GIS), FINDER Online (Web-Based GIS), and Tax Maps (2' by 7' B&W paper maps). A 'Welcome to MDP's Property Map and Data Products' section provides detailed information about the data products, including a list of available layers and download options. The website also includes a sidebar with 'INSIDE MDP' and 'PROPERTY MAP QUICK LINKS' sections.

OUR PRODUCTS

- MdProperty View DVDs**
Advanced Desktop GIS to use with ESRI's ArcGIS software. [More>](#)
- FINDER DVDs**
User-Friendly Desktop GIS to use with free custom software. [More>](#)
- FINDER Online**
Web-Based GIS to Use Online Hosted by MDP. Includes downloads of tax maps. [More>](#)
- Tax Maps**
2' by 7' B&W paper maps with color detail or digital TIF map images. [More>](#)

Welcome to MDP's Property Map and Data Products

The Maryland Department of Planning (MDP) annually updates the more than 2,900 property maps, or tax maps, for Maryland's 23 counties - Baltimore City maintains its own property maps. MDP distributes these maps to the public in electronic DVD format, online or as paper tax maps and digital map images with no included data.

Maryland's tax maps are updated and maintained electronically as part of MDP's Geographic Information Systems (GIS) database. The tax maps are then combined with recent parcel information from the Maryland State Department of Assessments and Taxation as individual parcel records are linked to their property locations on the tax maps.

Tax Maps, Parcel data, Computer Assisted Mass Appraisal (CAMA) data, recent Sale data and associated layers including aerial imagery, ZIP code boundary files, land use/land cover data, census geography and census demographic data, Priority Funding Area (PFA) designations, legislative and congressional district boundary files, flood plain data, generalized zoning designations, protected land boundaries, sewer service area boundaries and (except for FINDER Online) residential sales by point files for CY dating back to 2000 derived from the SDAT parcel data are available through MDP as:

- MdProperty View DVDs
- FINDER DVDs
- FINDER Online

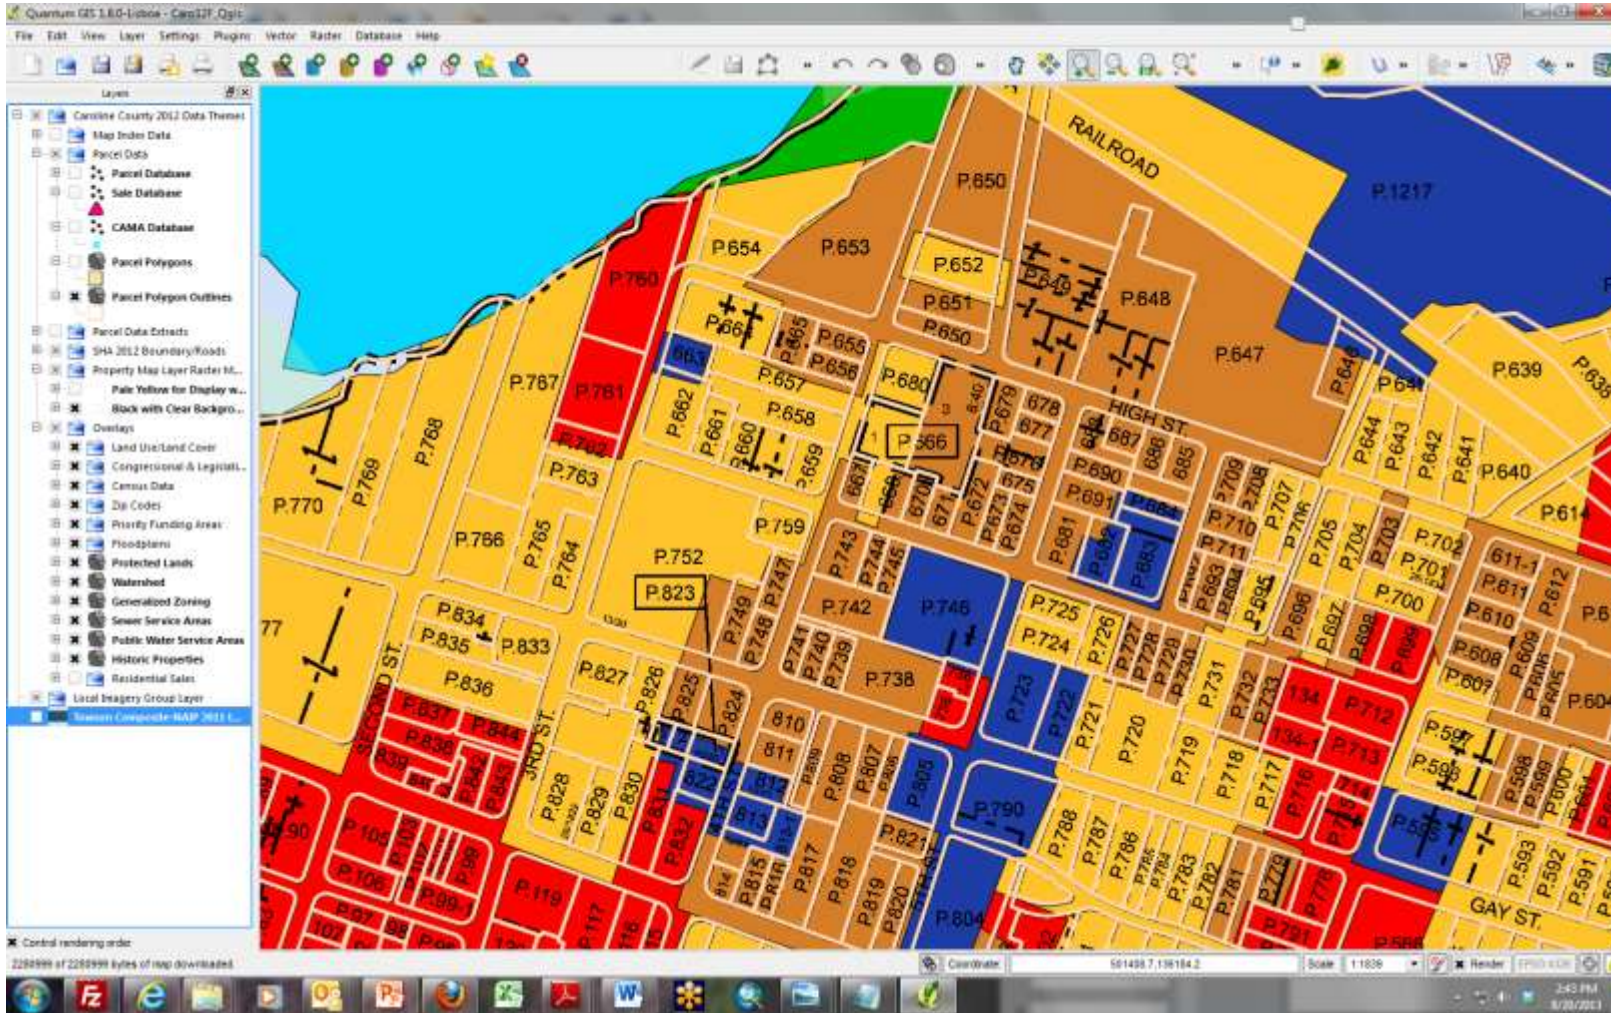

Copies of the tax maps with no associated data or map layers, are available through MDP as:

- Paper or Digital Tax Maps

About MdProperty View DVDs

FINDER QUANTUM

What Others are Saying.....

The image shows a screenshot of a web browser displaying a blog post on the geoMusings website. The browser's address bar shows the URL: <http://blog.geomusings.com/2013/10/07/maryland-department-of-planning-bundles-property-data-with-qgis/>. The page header includes the site name "geoMusings" and the tagline "geospatial technologies and practices". Navigation links for "Blog", "Archives", "Resources", "Samples", and "About" are visible. A search bar and a "BSS" link are also present. The main article title is "Maryland Department of Planning Bundles Property Data With QGIS", dated "OCT 07TH, 2013" with a "COMMENTS" link. The article text begins with "This past week, I got an e-mail from Jim Cannistra, Director of Data Planning Services and the Maryland Department of Planning (MDP), alerting me to a new product available from MDP called with QGIS with the industry". A highlighted section of the text reads: "So kudos to MDP for bundling their data with a powerful mapping, visualization, and analysis tool in QGIS. I hope that, in the near future, MDP considers making the FINDER application itself open-source but this is a great first step." The post is attributed to "Bill Dollins" and dated "Oct 7th, 2013", with tags for "FOSS4G, GIS, Maryland, OSGeo, QGIS, open source". Social media sharing options for LinkedIn, Twitter, Facebook, and Google+ are shown at the bottom.

Professional GIS Degree

Earn Your Master's Degree in GIS at UMBC in Rockville, Evenings

To that end, users that choose to take advantage of FINDER Quantum will want to keep in mind that great [QGIS-related resources](#) are available via [Salisbury State University](#) and that training is also available from [Randal Hale](#) of [North River Geographics](#). Once you have this powerful application installed, you can start to tap into a [deep pool of resources](#) to build your expertise.

So kudos to MDP for bundling their data with a powerful mapping, visualization, and analysis tool in QGIS. I hope that, in the near future, MDP considers making the FINDER application itself open-source but this is a great first step.

FINDER ONLINE

The screenshot displays the FINDER Online web application interface. The browser address bar shows the URL: <https://www.maryland.gov/onlinefinder/>. The application title is "FINDER Online".

Data Layers:

- Parcel Boundaries (MCMMap)
- Parcel Points (MDP)
- CAAA
- Parcel Sales
- Property Maps (2011)
- Property Map Index

Boundaries:

- County Boundary
- Municipalities
- Zip Codes
- 2010 Census Tracts
- 2010 Census Block Groups
- 2011 Congressional Districts
- 2012 Legislative Districts

Planning Data:

- Generalized Zoning
- Land Use/Land Cover
- Priority Funding Areas
- Protected Lands
- Sewer Service Areas

Other Data:

- [Unlabeled]

Tools:

Click on button icons to open or close tool options.

The main map area shows a red-shaded area with various parcel boundaries and points labeled with IDs such as P.180, P.257, P.258, P.259, P.254, P.252, P.250, P.248, P.975, P.976, P.978, P.979, P.980, P.981, P.973, P.972, P.971, and P.2156. A search bar at the top right contains the text "301 West Preston St, Baltimore". A scale bar at the bottom left indicates 100 meters and 100 feet. The Windows taskbar at the bottom shows the time as 4:57 PM on 8/9/2013.

Open Data Goals

- Users
 - Level 1 : All State agencies
 - Level 2: State/Local/Federal/Universities
 - *Level 3: Everyone*
- Publish Data
